- Dedicated and team-oriented professional with a passion for continuous learning.

EXPERIENCE

ADM, Los Angeles   SEP 2022 - PRESENT
Full Stack Developer

- Implemented an automation system for order processing with React & Node.js, boosting efficiency by 30%.
- Redesigned the main website using HTML, CSS, JS, and PHP, modernizing the UI and halving maintenance costs.
- Collaborated with teams to integrate new features based on feedback.
- Identified and addressed workflow inefficiencies to improve team productivity.

TS Solution, Saint Petersburg   APR 2021 - SEP 2022
Full Stack Developer

- Developed and deployed an e-commerce website for IT equipment sales.
- Integrated multiple suppliers through API, enhancing product variety and refining inventory management.
- Collaborated with marketing and sales teams to fine-tune website content/layout, boosting user engagement and sales.

Silver Duck Digital Agency, Saint Petersburg   NOV 2020 - APR 2021
Full Stack Developer

- Developed websites tailored to the needs of small and medium-sized businesses.
- Improved and optimized existing company projects for enhanced performance and user experience.
- Provided ongoing maintenance and support for client websites.

PROJECTS

Warehouse Management System:
A robust solution for goods and orders management, developed using **React**, **Redux**, **Node.js** and **MongoDB**. It boasts integration with BigCommerce and multiple vendor **APIs** to optimize inventory workflows.

Product Parser:
This is a Node.js-based tool utilizing **jsdom** that efficiently extracts and processes product information from various sources.

Dropshipping Platform:
An automated platform designed for dropshipping operations, crafted using React, Redux, and Node.js. It features seamless integration with vendor APIs to streamline product listing and transactions.
Image Optimization Tool:
Created with Node.js and **Sharp.js**, this tool focuses on optimizing image sizes without compromising their visual quality, ensuring a balance between performance and aesthetics.

Room Visualizer:
An immersive tool for users to visualize room designs, developed in **TypeScript** and **React**. The backend is powered by WordPress API and **PHP** to deliver a comprehensive user experience.
